

Virtual Field Trip

A Star Projector at the Planetarium to teach Astronomy with the use of educational technology.

The new and different types of technologies to teach Astronomy.

This is the Planetarium that I visited, it's located at Suffolk County Community College-Grant Campus.

Stellarium is a software that is used in the Planetarium which is projected on the dome for learning Astronomy.

StarLab Planetarium
A mobile education program that brings the Planetarium to the schools.

GoSkyWatch is a Desktop and mobile app planetarium that can be used in the classroom to learn Astronomy.

Interview with a professor that uses this educational technology tool for students to learn Astronomy.

To the Planetarium
